PREVIEW

ENTER YOUR AGE:

↻

| − | 1 | + |

Months: **12**   Days: **365**   Hours: **8.760**

IN THIS FIRST JAVASCRIPT PROJECT, I CREATED A SCRIPT WHERE BASED
ON THE AGE ENTERED BY THE USER, THE SCRIPT SIMULTANEOUSLY DISPLAYS
ON THE SCREEN THE MONTHS, DAYS, AND HOURS PASSED SINCE THEY WERE BORN

THE CODE

The project required creating the + and – buttons and displaying the counter through DOM manipulation with JavaScript. So, I decided to create each element in this way to keep the HTML code as clean as possible.

HTML

```html
<body>

<script src="assets/script/script.js"></script>

</body>
</html>
```

JavaScript

```javascript
// wrapper
const wrapper = document.createElement('div');
wrapper.className = 'wrapper';

const minus = document.createElement('button');
minus.className = 'minus';
minus.textContent = '-';

const num = document.createElement('span');
num.className = 'num';
num.textContent = '0';
```

DESIGN

FONT: POPPINS

ICON: FONT AWESOME

COLOR : #F0F0F0 #265073 #5DADE2
